Dear Hiring Manager,

I am writing to apply for Summer Intern role in Spotify, a prestigious name in the innovative technology. I am a master's student in Computer Science Negotiated Learning program in UCD with modules specializing in Data Science.

I offer nearly two years of industrial experience as a Programmer Analyst in Cognizant where I had worked on a project involving data processing & analytics. I have also contributed as a freelance data scientist for a Non-Profit Organization which focused on providing free education to children in the rural areas of Odisha, India. With the power of visualization techniques I, designed graph and chart to improve the analytical and interpretational skills of the children.

Apart from coursework, I devote my time to increase my skills in python, data visualization, and machine learning by developing projects on publically available datasets which can be found on my git-hub repository link provided above. I have also worked on different technologies and tools which demonstrates my ability to adapt to new technology.

I would like to thank you for taking the time to review my application. I look forward to hearing from you in the near future to schedule an Interview.

Yours Faithfully,  
Amarnath Manipatra
